Look Flawless Under Your Wedding Dress

by [Felicia](#) on July 29, 2013

There are three situations no bride wants to experience on her wedding day. The first is zits, the second is being unable to fit into her dress, and ok, maybe the third isn't a recorded 'fear'... but who wants to constantly pull up and readjust their bra and dress while dancing at the reception/after-party? I don't like fidgeting with mine at *anytime*, as a matter of fact.

*As Alice would say, "Curiouser and curiouser;"... 2013 bridal collections marry traditional with unconventi
in the form of colour, which means it's an exciting time to pick one's gown. Whether you choose blush pinks,
blues, some sunshine-y hue, or the traditional cream/ivory/white tones, here are some ideas for what goes on*

underneath different wedding dress styles

Portrait Back Wedding Dresses

Portrait backs are demure yet sexy, mysterious yet revealing. But you definitely want to keep your nipples from peeking through and ruining the effect with a distraction! You can either sew your bra cups into the dress, or try some nipple covers –they’ll come in handy long after the big day has come and gone.

Strapless/Sweetheart Wedding Dresses

TOP

Strapless dresses were a little overdone in recent years, but with enough classic lines in the dress, they can still be an elegant style. Try bustiers if you're in the mood for getting really dressed up –otherwise, strapless bras should do the trick! Be sure to get them well-fitted if you're not sewing them into your dress, so there is no wiggle room for error... *ahem* wardrobe malfunction.

Plunging Neckline Wedding Dresses

For some deep necklines, you can still wear a bra –others you can't and must rely on cups sewn into your dress –especially for those light, sheer dresses that you might fancy wearing for a hot summer's wedding! But if your dress allows you to get away with a bra, you should try a balcony, demi cup or plunge bra:

And for all other tricky bridal dresses...

Try a convertible bra – the chameleon of the lingerie world. All strapless bras are considered convertible, allowing you to wear your straps in various ways to accommodate even the hardest-to-wear fashions. Not all convertible bras are strapless, like this f3226 [Ck One Microfiber Convertible T Shirt Bra Push Up Bra by Calvin Klein](#), but the advantage is being able to have a lower neckline for some of these styles, which some strapless bras don't permit; and allows more options for arranging your bra straps.

Don't Forget Your Seamless Shapewear...

And for any lumps, bumps and to avoid the appearance of panty lines under slinky silhouettes, consider investing in some [shapewear](#) or seamless pieces! Remember, you don't *have* to wear nude or white lingerie. Perhaps you want it to peek out in a more intense/contrasting/complementary hue out of your dress? Give it a go!

*... and bring your **Body Tape!***

A must-have for every bride, bridesmaid and guest... this secures clothing in place, fixes gaping blouses, hemlines and more! Now go and get one before I make some awful Yoda joke about how this tape binds the galaxy together... and see [Felicia's vlog about How to Use Body Tape!](#)
